

# The Socratic Experience

PARENT GUIDE

Unleash and develop  
your child's path to  
self-mastery

INTRODUCING

# The Socratic Experience

The Socratic Experience is an online highly personalized learning community designed to cultivate your child's unique genius, with a particular focus on intellectual, creative, and entrepreneurial genius.

Where standard schooling pushes your child through their curriculum, we identify your child's genius and crank it up to give them the best lifetime opportunities by graduation.

Your child receives personal coaching on how to achieve extraordinary goals in their chosen domains of excellence while learning essential academic and personal skills.

“

***“Confident, articulate, creative, and critical thinkers will lead in the 21st century.”***

Michael Strong

*The Socratic Experience Founder*

# A typical day for a novice

## Community

---

Check in with each other, present their work and show appreciation.

## Architectonics

---

Create stories inspired by the Five Great Lessons of Montessori.

## Socratic

---

Use debate skills to solve mathematical problems, sort through complex texts and address ethical issues.

## Lunch

---

Eat lunch, bond with nature, share poems, go on scavenger hunts and even do culinary activities.

## Offline Learning

---

Pursue various art projects, including drawing, sculpting, cooking and writing or performing music.

## Projects

---

Individual and in groups, led by guides with assistance from TSE Middle School apprentices.

## Council

---

Intently listen and speak, becoming more understanding and gaining a sense that all students are equals.

## Advisory Sessions

---

Check in with their advisors and discuss progress on attaining goals.

# A typical day for a middle & high school student

## Community

---

An informal guide-led conversation to start the day socially, much as they would in an in-person school.

## Personal Growth

---

The guide sets a topic about big picture or personal issues, to discuss how to live a better, happier life.

## Socratic

---

A discussion on a complex text, classic or contemporary, similar to the work required on the SAT verbal exam.

## Writing

---

Work on essay topics of their own choosing based on the intellectual dialogue they just had in the Socratic discussion.

## Projects

---

Each student is expected to do a personal project based on their own interests, while being coached.

## Lunch

---

Students have an hour off for lunch. They are encouraged to get off the computer and engage in some movement.

## Math

---

Work through self-paced adaptive math curricula suitable to their level and ability, while being guided.

## Science

---

From standard classes such as Biology, Chemistry, or Physics as well as cool science options such as the Science of Video Games, Optimizing the Human Body, and Java Development.

## Electives

---

Electives include Art, Music, Video Production, Graphic Design, Audio Engineering, Spanish, Debate, U.S. History, World History, Fitness, and more.

TESTIMONIALS

# What students and parents say

“

“M has always enjoyed school but I have never seen her as excited and joyful as she was today to be back in class at TSE. I am so grateful that she has this opportunity.”

*Benjamin, Parent*

“My son has rediscovered his love of learning and school. We are so grateful”.

*Lea, Parent*

“I learned more from 15 minutes here than I did in months at BASIS!”

*John, student*

OUR DIFFERENTIATORS

# Why enroll your child?

The Socratic Experiences's Guides are committed to your students' success. Every Socratic Experience student collaborates with their Lead Guide - an experienced mentor and learning coach - so that none are lost in the shuffle of pandemic virtual or hybrid learning.

At The Socratic Experience, students become confident, sophisticated thinkers with developed, textured beliefs. They understand what they're learning rather than emphasize giving "the right answers."

Given our emphasis on autonomy, freedom of thought, and adult-level performance, our students are brilliantly-prepared to enter the college of their choice; careers in art, design, film, entrepreneurship; or "New Collar" jobs such as coding, digital marketing and UI/UX.

Academic-track students through Michael Strong's programs have obtained SAT gains almost twice the national average by means of our fun, engaging yet intellectually intense Socratic program.

# Tuition Fees

If you need additional guidance with selecting the best program for your kid, schedule a call with us. We're here to help.

# Can you imagine your child loving school while they excel?

The 21st century requires rich reading abilities, people versed in deep discussions, and collaborative problem-solving. It needs leaders who are purpose-driven and can inspire meaning. It needs students who are unafraid of the unknown and are excited to learn.
